How to reinitialize the E-Token

Go to Start > Run: Regedit (OK)

Browse to:

HKEY_LOCAL_MACHINE\SOFTWARE\Aladdin\eToken\eTProperties

And modify the advanced entry to be: 31 decimal.

This would help you set the initalize the eToken through the RTE itself

Moreover; you could set your own admin password in the eToken.

Pres initialization in the "start-all programmes-etoken-etoken properties".

PLEASE NOTE ALL DATA WOULD BE WIPED OUT AT THE TIME OF INITALIZING.
